

**MAXIMUM RESIDUE LIMITS FOR RESIDUES OF VETERINARY DRUGS IN FOOD**

“Food producing species” refer to the following animals:

| S/N | Group name  | Species  |
|-----|-------------|--|
| 1   | Bovine      | Cattle, buffaloes and bison.   |
| 2   | Caprine     | Goat   |
| 3   | Ovine       | Sheep  |
| 4   | Porcine     | Pig, swine   |
| 5   | Poultry     | Domesticated birds kept for eggs or meat, including chicken, turkey, duck, goose, quail, guinea-fowl, pigeon.  |
| 6   | Equidae     | Horse, donkey, zebra.  |
| 7   | Game        | Wild animal hunted or raised for its meat. Small game includes rabbits, pheasants, geese or ducks. Large game includes deer, moose, and bear.                              |
| 8   | Fin fish    | A bony or cartilaginous fish such as salmon, trout, grouper, tilapia, pomfret, snapper, pompano, in contrast to other aquaculture species such as molluscs or crustaceans. |
| 9   | Crustaceans | Crabs, lobsters, crayfish, shrimps, prawns.  |
| 10  | Molluscs    | Snails, clams, scallops, oysters, octopus and squid.   |
| 11  | Salmonidae  | Salmon and trout   |
| 12  | Ruminants   | Cattle, goat, sheep, deer  |
| 13  | Mammalian   | Cattle, goat, sheep, deer, donkey, swine, pig, horse   |

These maximum residue limits (MRLs) for veterinary drug residues take effect on the effective dates indicated in the table below.

| Veterinary Drugs           | Animal Species                             | Tissue | MRL (ppb) | Effective date |
|----------------------------|--|--------|-----------|----------------|
| 6-Alpha-Methylprednisolone | Cattle                                     | Muscle | 10        | 01-May-20      |
| 6-Alpha-Methylprednisolone | Cattle                                     | Liver  | 10        | 01-May-20      |
| 6-Alpha-Methylprednisolone | Cattle                                     | Kidney | 10        | 01-May-20      |
| 6-Alpha-Methylprednisolone | All other mammalian food producing species | Muscle | 10        | 17-Jan-22      |
| 6-Alpha-Methylprednisolone | All other mammalian food producing species | Liver  | 10        | 17-Jan-22      |
| 6-Alpha-Methylprednisolone | All other mammalian food producing species | Kidney | 10        | 17-Jan-22      |
| 6-Alpha-Methylprednisolone | All mammalian food producing species       | Fat    | 10        | 17-Jan-22      |
| Abamectin                  | Cattle                                     | Liver  | 100       | 01-May-20      |
| Abamectin                  | Cattle                                     | Kidney | 50        | 01-May-20      |
| Abamectin                  | Cattle                                     | Milk   | 20        | 17-Jan-22      |
| Abamectin                  | Cattle                                     | Fat    | 100       | 17-Jan-22      |
| Abamectin                  | Goat                                       | Muscle | 20        | 17-Jan-22      |
| Abamectin                  | Goat                                       | Liver  | 25        | 17-Jan-22      |
| Abamectin                  | Goat                                       | Kidney | 20        | 17-Jan-22      |
| Abamectin                  | Sheep                                      | Muscle | 20        | 01-May-20      |
| Abamectin                  | Sheep                                      | Liver  | 25        | 01-May-20      |
| Abamectin                  | Sheep                                      | Kidney | 20        | 01-May-20      |
| Abamectin                  | Pig  | Muscle | 20        | 17-Jan-22      |
| Abamectin                  | Pig  | Liver  | 20        | 17-Jan-22      |
| Abamectin                  | Pig  | Kidney | 10        | 17-Jan-22      |
| Abamectin                  | Pig  | Fat    | 20        | 17-Jan-22      |
| Amoxicillin                | Cattle                                     | Muscle | 50        | 01-May-20      |

In addition to the above maximum residue limits for veterinary drug residues, Regulation 33 of the Food Regulations stipulates the following:

No person shall import, sell, advertise, manufacture, consign or deliver, any meat or any food derived from meat which contains residues of the following compounds:

- (a) diethylstilbestrol (3, 4-bis(p-hydroxyphenyl)-3-hexene);
- (b) hexoestrol (3, 4-bis(p-hydroxyphenyl)-n-hexane);
- (c) dienoestrol (3, 4-bis(p-hydroxyphenyl)-2, 4-hexadiene).
